2015 Consulting Engineering/Geoscience Industry
Forum with

SaskPower

Wednesday, September 30, 2015
Ramada Plaza, Regina SK

A **priority** event for consulting engineering/geoscience firms interested in, or currently doing business with SaskPower

Last Year's Forum – The Ice Breaker:

ACEC-SK initiated and delivered its 2014 membership forum with guest speakers from SaskPower. Attendees overwhelmingly indicated the information imparted to be most beneficial for their individual businesses.

Results – The Dialogue:

The forum delivered a stronger working relationship between ACEC-SK and SaskPower, including a joint meeting between senior leadership of both organizations. Over the past year progress has been made on several common industry issues. SaskPower acknowledged our industry's concerns and we have been working collaboratively to seek solutions that work for both parties.

Building on Success – Continuing the Conversation:

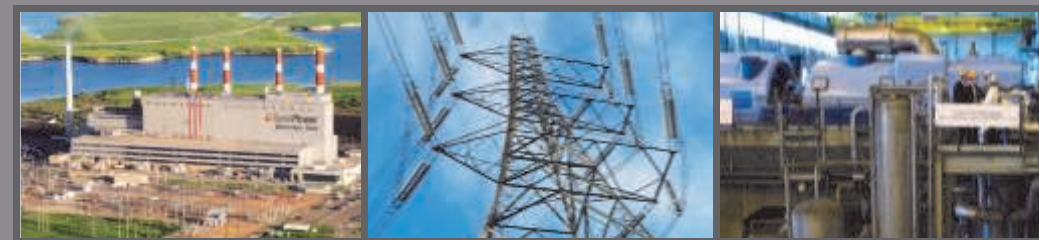

ACEC-SK is continuing the dialogue in 2015 with SaskPower presentations that offer new information in the context of today's economy and government-wide initiatives, including:

- commitment to continue conversation from SaskPower's Vice President of Procurement and Supply Chain
- updates on SaskPower procurement initiatives directly impacting consultants, some of which are a direct result of the on-going dialogue
- SaskPower response to government-wide initiatives
- updated information on potential Transmission and Power Production initiatives that could directly impact your business

A reception will follow, providing opportunity for the consulting industry and front line SaskPower representatives to socialize and network in an informal environment.

Your attendance will indicate strong support for a continued exchange between ACEC-SK and SaskPower.

We look forward to seeing you.
