MUNICIPAL ENGINEER-IN-TRAINING

JOB POSTING

DATE POSTED: MARCH 1, 2025

CLOSING DATE: APRIL 30, 2025

PLEASE APPLY TO CAREERS@SALENGINEERING.CA

Company Background

SAL Engineering Ltd. is a locally-owned Saskatoon firm that has been providing professional municipal engineering and project management consulting services throughout Saskatchewan since 1980. We take pride in our technical expertise and in offering excellent service to our clients.

SAL Engineering Ltd. works with Federal, Provincial, and Municipal governments, as well as First Nations and the private sector. We provide engineering services for a significant variety of projects related to the development and expansion of:

- Rural waterline systems
- Water treatment plants and pumphouses
- Water and sewer mains
- Subdivisions
- Sewage lagoons and pumping stations
- Solid waste facilities
- Drainage systems
- Roadways

Position Details

The successful candidate will be responsible for the following items pertaining to the types of projects outlined above:

- Municipal design and flow modelling (WaterCAD)
- Water and sewer system assessments
- Field surveys and data imports
- Waterline routing evaluation
- Assessment and design reports
- Drawings (Civil 3D) for pre-design, design, and post-construction
- Project approvals and permits, including utilities and regulatory agencies (municipal, provincial, federal)
- Design, bidding, and contract documents, including drawings and specifications
- Project tendering
- Construction management, including shop drawings, site meetings, price requests, change orders, progress payments, and performance certificates
- Construction site inspection, legal land pin location, staking, and layout using GPS, theodolite, and level
- Design and construction coordination with sub-consultants
- Meeting attendance and engineer's report preparation and presentation
- Client and project team correspondence
- Overall project budgeting and detailed opinions of probable cost
- Project scheduling
- Proposals and consulting agreements for new projects
- Terms of reference for sub-consultants and additional consultants
